CPS Basics Now Provides High Capacity, Low Cost Solution for UPS and USPS Shipping

FORT MYERS, FL – September 16, 2013 – Today, Harvey Software, Inc., the well-known leader in providing multi-carrier shipping software for the past 30 years, announced the availability of a two carrier optimized version of its popular CPS Basics® shipping software system that focuses on specific business needs. The two carrier version of CPS Basics is designed for small business Internet retailers and others who want to utilize the offerings of UPS® and the US Postal Service® to their best possible advantage.

"We are excited to again offer our CPS Basics program," said Bert Hamilton, Harvey Software's CEO. "CPS Basics is easy to install and use and is specifically targeted for small business shippers. All CPS Powered shipping software is carrier compliant, so you are ready to start shipping immediately after setup. CPS Basics is the quick way to go from order to label to tracking without any changes to current procedures or custom programming," Mr. Hamilton continued. "CPS Basics provides merchants lightning-fast shipping with mistake-proof technology that can use data directly from their order system," Mr. Hamilton explained. "CPS Basics slashes package processing time to seconds as it electronically shops for the best rate among the carriers and services you specify. The included Address Verification Module assures the most accurate commercial/residential rate comparisons while minimizing undeliverable packages. CPS Basics provides a powerful combination that streamlines shipping and puts immediate value right on the bottom line," Mr. Hamilton concluded.

For more information and to learn how CPS Basics can improve your bottom line, visit:
