Multi-Carrier Shipping Software Adds Support for Additional Mettler Toledo Scales

FORT MYERS, FL – September 17, 2013 - Today, Harvey Software, Inc. announced that its entire line of CPS™ Powered multi-carrier shipping software now directly supports the Mettler Toledo USB shipping scales, providing shippers with an additional USB connected shipping scale for their package shipping operation.

“The PS60 parcel scale is one of the most popular shipping scales in the world. Its renowned performance and reliability make it the preferred choice for warehouses, shipping docks, and corporate mail rooms using Harvey Software’s CPS Powered multi-carrier shipping software”, states Richard Sliwinski, Product Manager for Mettler Toledo. The PS60’s heavy duty metal construction and advanced load cell technology will stand up to the roughest handling of heavy packages.

“We are glad to present Mettler Toledo USB scales as a shipping room scale option for our CPS Powered shipping software users,” stated Bert Hamilton, Harvey Software's President and CEO. “The hallmark of these scales is a rugged and reliable design for long life with simple set up and operation,” explained Mr. Hamilton. “Plug it in to your computer, tell our shipping software which model scale is connected, and you are set,” said Mr. Hamilton. “These scales are perfect for parcels, with high accuracy weighing as well as being agency approved as Legal for Trade. Mettler Toledo’s complete product offerings include display and platter options, so there is a Mettler Toledo scale that is right for every shipper,” Mr. Hamilton concluded.
