Multi-Carrier Shipping Software Updates to Latest FedEx Shipping Technology

FORT MYERS, FL – May 22, 2012 - Today, Harvey Software, Inc. announced it has updated its flagship Computerized Parcel System (CPS™) multiple carrier shipping software system to include the latest FedEx shipping software technology, FedEx® Web Services. CPS with FedEx Web Services opens new FedEx shipping options for its users as well as now providing an option for the FedEx SmartPost® service.

"Speed has always been a priority for processing all packages, including FedEx shipments, in our CPS shipping software. Our programming department has incorporated this new FedEx technology into CPS, making a fast shipping system even faster with this update – a feat that took considerable ingenuity on the part of that team. 'Beta' users of this new system tell us CPS is even faster and smoother than before," stated Bert Hamilton, Harvey Software's President and CEO. "In addition, this update includes a variety of new features and capabilities that enhance FedEx shipping, from smoother international package processing to being able to use the FedEx SmartPost® service with that Premium service option for CPS," explained Mr. Hamilton. "We think CPS users will be extremely pleased with what CPS now has to offer in providing the latest shipping technology in a multi-carrier shipping system. Whenever our CPS program lets a shipper take advantage of cost savings and great delivery performance, our customers win," Mr. Hamilton concluded.

About Harvey Software, Inc.

Harvey Software is an established, leading developer of globally ready, multi-carrier shipping software solutions, providing businesses with shipping solutions since 1983. Harvey Software's premium shipping solution, the Computerized Parcel System (CPS™) increases profits, boosts domestic and international shipping efficiency, reduces shipping expenses and eliminates the inefficiencies of single carrier software systems. CPS is a FedEx® Compatible Solution, is UPS Ready®, USPS® certified and works with Internet Postage. CPS can be purchased, downloaded, installed, and supported all over the Internet.
