Multi-Carrier Shipping Software Adds FedEx SmartPost Shipping Option

FORT MYERS, FL – July 18, 2012 - Today, Harvey Software, Inc. announced that its flagship Computerized Parcel System (CPS™) multiple carrier shipping software system now provides an option for shipping with the FedEx SmartPost® service. The recent CPS update supporting FedEx Web Services technology added the capability for the FedEx SmartPost option for CPS.

"The FedEx SmartPost Module can be added to any CPS shipping software solution. FedEx SmartPost is a welcome addition to the other carrier/USPS hybrid services supported by CPS. FedEx SmartPost can be used as easily as any other carrier and service in CPS. CPS users can choose FedEx SmartPost for any package, or let CPS RateBots™ automatically select FedEx SmartPost when it is the right choice," stated Bert Hamilton, Harvey Software's President and CEO. "The number of companies looking for the best and least expensive alternatives to ship lighter packages, especially to residential addresses, is growing. The new FedEx SmartPost Module puts CPS users in the driver's seat. Simply let CPS determine when FedEx SmartPost is the right choice and the work is done," Mr. Hamilton explained. "For added incentive, any CPS shipper can try our new FedEx SmartPost Module for one year at a special savings if purchased during the month of July." Mr. Hamilton concluded.

About Harvey Software, Inc.

Harvey Software is an established, leading developer of globally ready, multi-carrier shipping software solutions, providing businesses with shipping solutions since 1983. Harvey Software's premium shipping solution, the Computerized Parcel System (CPS™) increases profits, boosts domestic and international shipping efficiency, reduces shipping expenses and eliminates the inefficiencies of single carrier software systems. CPS is a FedEx® Compatible Solution, is UPS Ready®, USPS® certified and works with Internet Postage. CPS can be purchased, downloaded, installed, and supported all over the Internet.
